ALL THE WAY TOGETHER

Finansforbundet is the trade union for employees and students working in the financial sector – in fact eight out of ten financial sector employees in Denmark have a membership with us. With such a large amount of backing, we are able to negotiate collective agreements with attractive common terms for annual leave, becoming a parent and salary/wages; our focus is firmly on the well-being and success of the individual in their studies and their working lives.

We invite you to join our community and get the inspiration and financial advice and benefit from it – already from when you begin your studies to when you land your first job. We have special offers available that are geared specifically towards student life and if you ever need to know more about finance, look no further than our courses and events, which can give you inspiration!
